The TE Connectivity EGCS-D0 and EGCS-D1S series accelerometers are rugged DC sensors designed for harsh measurement applications. The accelerometers are critically fluid damped and feature a full bridge output configuration with mechanical over-range stops for outstanding shock survivability. The damped EGCS-D0 and EGCS-D1S designs are available in ranges from $\pm 5g$ to $\pm 10,000g$ and feature 0-5000Hz frequency response (range dependent).

The EGCS-D0 and EGCS-D1S accelerometers can be powered with a range of 2-15Vdc excitation voltage. The accelerometers have a standard cross-talk accuracy of $<3\%$ and a standard ZMO (zero measurand output) of $\pm 20\text{mV}$.

The EGCS-D0 & EGCS-D1S series are environmentally sealed with IP65 protection. The -D0 option has a screw mounted flange configuration while the -D1S option has a stud mount configuration.

A triaxial mounting block, PN AC-A04686, is also offered for multi-axis measurement installations.
